

A Difficult Ventilating Problem on one of the Buildings of The Jeffrey Mfg. Co., Columbus, Ohio, successfully solved by the use of

Schoedinger's Rotary Suction Ventilators

The

INNER AIR PASSAGE

located so that the full discharge of air is directly over the Head of the Ventilator is the secret of its unusual efficiency.

The New Damper in the Head of SCHOEDINGER'S ROTARY SUCTION VENTILATORS makes them absolutely weatherproof

The Condition of the AIR in Your **FACTORY**

has much to do with your

Success

as a Manufacturer.

Your working force must have Fresh Air and

Proper Ventilation

if their production is to climb toward the maximum.

Patent Applied for

Schoedinger's Rotary Suction Ventilators

will bring this fresh, pure air to these working people at

Minimum Cost

and will also bring a large measure of contentment with working conditions.

Winds and Breezes

which blow over your FACTORY furnish the necessary power to operate these ventilators at

No Cost for Operation

These Ventilators will prove a sound and satisfactory investment for you.

Secure definite information regarding our system
while this subject is still fresh in your mind.
